

# BRANFORD PUBLIC SCHOOLS SUCCESS WITH WEB ACTIVE DIRECTORY

Using PeoplePlatform for Provisioning and User Management

*“We evaluated many products to help us with provisioning accounts for staff. Web Active Directory’s comprehensive interface and feature set were the major draws for us.”*

■ *Tom Pisani, Director of Technology Branford Public Schools*

## INTRODUCTION

Tom Pisani, Director of Technology at Branford Public Schools in Branford Connecticut, now provisions student and staff accounts faster and with accurate information since he installed Web Active Directory’s provisioning and user management solutions.

### Challenges

The challenges Branford Public Schools faced were:

#### **Manual Provisioning and Updating**

IT was manually provisioning new students and employees as well as updating Active Directory profiles taking up time and incurring an unwarranted cost.

#### **Data Entry Errors**

Mistakes made due to manually entering data caused inaccurate content for students and staff.

#### **Limited IT Resources**

Inputting data took several hours each day taking away IT resources from more important projects.

### Web Active Directory’s PeoplePlatform Solution

Once Web Active Directory’s PeoplePlatform was implemented, Branford Public Schools developed a more efficient process:

#### **Automation Saves Time**

Provisioning and updating student and employee profiles with an automated process reduced the time required to manually input data.

#### **Automation Reduces Errors**

Automating the process eliminated errors created by the former manual process.

#### **IT Got Time Back**

Automating user account creation gave more time to the IT department to focus on critical projects the district required.

## Conclusion

After deploying Web Active Directory, Branford Public Schools determined that they save an estimated \$10,500 annually by reducing the time taken to provision accounts from several hours to under a minute.

They now have a provisioning and updating solution that allows the IT department to properly apply time and resources to other critical issues the district requires. In doing so, the district can achieve accurate data in their Student Information System, reduce cost, and employ the IT team to projects more pertinent to their job function.

## About Web Active Directory

Web Active Directory provides an Identity Management platform to web-enable Active Directory technologies. We provide software and services on-premise or in the cloud saving money and time for IT technologists and empowering end-users not to be beholden to them.
